1.0 EXECUTIVE SUMMARY

Group One (1) Project Management Team (G1PMT) is seeking Seventy Thousand United States Dollars (US\$70,000.00) from the Administration of the Liberia National Police Department(LNPD) , client, for the installation, configuration and regulation of a high-definition closed-circuit television (HD CCTV) camera system for administrative use on the Liberia National Police Department (LNPD) Broad Street center Monrovia.

The cameras setup will be used in a professional and ethical manner in accordance no the LNPD's policy and regulations. The support from administration of the Liberia National Police Department's (LNPD) goes towards the direct costs associated with the project activities including project logistics and labor cost.

Cameras will be positioned with in Specific Streets Corner Buildings, in the care of the Patrol Officers on the Streets. He or she will be responsible for compliance and the security of the Street.

Following the introduction of these procedures, a program will be decided to manage the Street's cameras onto a common platform which will allow all recordings to be monitored from the Security Control Room. Due to public concern surrounding a surveillance society, the use of CCTV surveillance must be consistent with respect for individuals' privacy. Other methods of achieving the objectives of a CCTV surveillance system will therefore be considered before the installation of the CCTV cameras on the Main street.

2.0 INTRODUCTION

Group One (1) Project Management Team (G1(ONE)PMT) is a team of legally registered project managers, recognized in May 2021 to professionally succeed local, international and multinational ICT projects (Company). G1PMT has already executed over twenty successful ICT projects with local and international institutions such as the Nigerian House (Embassy), Starz University, Liberia Airport Authority (James sprigs Payne's Airport), Dream Academy, Liberia Institute for professional studies (LIPA) etc.

2.1 Our team consists of well-trained project personnel's, listed below:

#	NAME	ID#	POSITION
1	James S Kessedu	2099	Project team member
2	Kumba K. Kpayama	2446	Project team member
3	Salome N. Qua-yon	2667	Project team member
4	Mikeson N. Ziah	2662	Project team member
5	Sulaiman A. Barry	3878	Project team member

3.0 Project Site Overview

4.0 NEEDS/PROBLEMS

This project is being undertaken to provide a High-Definition camera system for monitoring activities on the main street on Broad Street (LNPD).

Will Be:

- **Cameras be able to Detect Burglars, Thieves, Vandalism, Sexual Crimes, etc.**

There have been cases of vandalism of the former Education building's properties, burglaries, theft and some sexual allegations. With the deployment of the Broad Street center Monrovia's surveillance, there will be plain in sight and a great deterrent for criminals. No one wants to be caught in the act, thereby slowing down crimes or criminal activities on Broad Street.

For example, when there are school video surveillance cameras installed in school parking lots, potential perpetrators may think twice before committing a crime. About 60% convicted burglars stated the presence of a security camera system influenced their decision to look for another easy target.

- **School Surveillance Security Cameras Help Stop Bullying in Schools**

Why should security cameras be allowed on street corner and other buildings? One of the reasons is that it'll help reduce criminals activities.

Criminals taking away phones from citizens at night is a serious matter on Broad Street. Under the surveillance of CCTV on the street, Citizens tend to behave well, which is definitely an effective way to stop crime.

It has been reported that there has a 70% drop in stealing at any street that have implemented CCTV security cameras system.

➤ **Street CCTV Security Cameras Are Effective to Protect Both Citizens and properties**

Some Criminals would harass their Citizens in some cases. With the CCTV surveillance cameras installed in Street Corner and other places, those unscrupulous criminals generally would not hurt peaceful Citizens at night.

However, in some cases, some Criminals who would get accused of Burglars or harassment by Broad Street Residents, but the Criminals are innocent. The resident accuse the criminal just because of some minor reasons. For example, the Residents are too strict on the Criminals study or rebuke the Residents when criminals steal on the street.

Being accused by Citizens for burgers and harassment would damage the Citizens reputation and make him or her lose the job. And the Citizen might spend the next 10 years of his or her life in prison because of something a Residents said.

But if there are CCTV cameras on the Street Corner and other places, you can see who would be responsible for the issue.

➤ **Patrol officers or Security Cameras Are Helpful to Keep an Eye on Criminals, Peaceful Citizens and Visitors**

CCTVS on Broad Street can keep a track of everyone in and out of Broad Street.

Some of the Citizens often violate city regulation. With Street CCTV camera footage, the administrators can keep a track of those activities, which helps the city administration decide how to solve this issues.

Keeping an eye on Patrol officers will let Liberia National Police Department (LNPD) administration know which Officers is accountable for his/her job. More importantly, installing CCTV security cameras (systems) for Street Corners and other places reminds Buildings that their locations is important and always being observed.

public places like Street center, there are many visitors (People) entering and leaving Broad Street every day. Street CCTV security cameras (systems) make it easier for Police Department to watch any visitor. It's a useful way to eliminate unauthorized intruders.

This problem has affected the Big Cities since its inception in 1996 and with this project's implementation, a lot can be done towards solving these problems and more.

5.0 GOALS OF THE PROJECT

The Goals of this project are to:

- ✓ Enhance the safety of the Citizens 's population and protect the Residents of Broad Street center Monrovia's properties.
- ✓ Respect the privacy of the administration of the Liberia National Police Department and Citizens, members of the Broad Street Residents and guests.
- ✓ Provide transparency in the use of CCTV camera technology in achieving a safe and secure Street environment.
- ✓ Support the mission of the Division of Public Safety at the Liberian National Police.

6.0 SCOPE OF THE PROJECT

This project and every major project has four (4) major activities: project documentation, procurement of project logistics, project implementation, and project closing/turn over.

The outcome of this project is to procure and deploy an effective and efficient HD CCTV camera system for the Liberia National Police Department (LNPD). This project will be managed from a secure room and identify the various Officers on Duties and Street Corner's where the camera will be installed. This project is not intended to be extended to other streets in center Monrovia.

- **General purpose: Implementing a HD CCTV Camera System for administrative use for monitoring Broad Street center Monrovia**

Topics (Aspects) studied: security risk for Night Patrol officers', population and properties

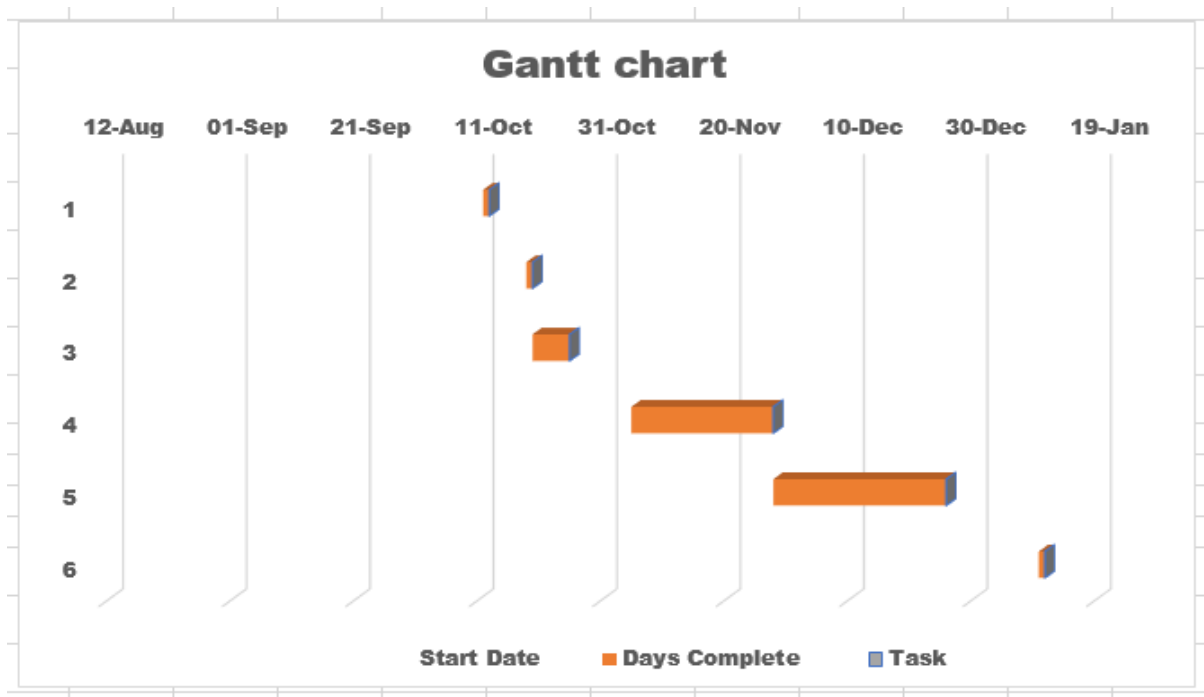

Population or Citizens: Administrators and the Broad Street populace

Entire projected period of the study: October 20 -January 10, 2022

7.0 PROJECT TIMETABLE

Task	Description of Work	Start and End Dates
Phase one	First Meeting	October 12, 2021
Phase Two	Second Meeting	October 19, 2021
Phase Three	Project Documentation	October 20– 31, 2021
Phase Four	Procurement of project logistics	November 5- 26, 2021
Phase Five	Project Implementation	November 28– December 25, 2021
Phase Six	Project Closing/Turn Over	January 10, 2022

Client	LIBERIA NATIONAL POLICE DEPARTMENT (LNPD)
Sponsor	Dr. Bill M. Gayflor
Project manager	GROUP ONE
Team	[James S Kessedu], [Kumba K. Kpayama], [Salome N. Qua-yon], [Mikeson N. Ziah], [Sulaiman A. Barry]

11.0 EVALUATION

The project team will develop a monitoring strategy to examine the progress of the project. The team will prepare weekly and final reports to inform stakeholders on the status of the project and its activities. Additionally, the team will organize review meetings and feedback sessions with stakeholders to promote inclusive participation, assess the level of progress, challenges and to recommend next steps for the project.

12.0 ENDORSEMENTS

The project is entirely sponsored by:

Dr.Bill M. Gayflor

Instructor

Starz University

College of Science & Technology
